Profile Summary

Integrated M.Tech student in Computational Data Science with strong focus on Machine Learning and Data Analyst roles. Experienced in building ML models, data preprocessing, and deriving insights using Python, SQL, and Scikit-learn. Strong foundation in statistics, data structures, and end-to-end data-driven problem solving with a focus on real-world applications.

Education

- **Vellore Institute of Technology** (Oct 2022 – 2027)
Integrated M.Tech in Computer Science and Engineering *CGPA: 8.62/10*

Technical Skills

- **Programming:** Java, Python, SQL
- **Core CS:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Problem Solving
- **Software Engineering:** REST APIs, Spring Boot (Basics), Backend Fundamentals, Data Pipelines, ETL Workflows, Modular Programming
- **Machine Learning & Analytics:** Scikit-learn, NLP, TF-IDF, Text Classification, Model Evaluation, Feature Engineering, Exploratory Data Analysis (EDA)
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn, Excel
- **Tools:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Linux Basics, HuggingFace, LLM Tooling

Projects

AI-Driven News Credibility and Influence Analysis *Jan 2026 – Present*
Python, NLP, Scikit-learn, HuggingFace, Pandas

- Built an end-to-end NLP and machine learning pipeline to classify credible and non-credible news articles using Scikit-learn and Python.
- Processed and analyzed 45,000+ text records using scalable preprocessing and modular workflow design.
- Designed reusable preprocessing, TF-IDF feature engineering, and model evaluation workflows for efficient ML experimentation.
- Automated preprocessing and evaluation pipelines to improve workflow scalability and system reliability.
- Trained and evaluated Logistic Regression and SVM models using accuracy, precision, recall, and F1-score metrics.
- Managed and version-controlled project workflows using Git and GitHub.

Fake News Detection System *Dec 2025*
Python, NLP, Scikit-learn

- Developed a machine learning model to detect fake news from textual data using Python and Scikit-learn.
- Applied NLP preprocessing techniques including tokenization, stopword removal, vectorization, and text cleaning.
- Structured reusable preprocessing workflows for efficient feature engineering and experimentation.

Student Performance Analysis *Oct 2025*
Python, Pandas, NumPy, Matplotlib, Seaborn

- Conducted exploratory data analysis (EDA) to identify academic performance trends and patterns.
- Processed structured datasets using Pandas and NumPy for analysis and reporting.
- Built reusable data processing and visualization workflows using Python libraries.

Certifications

- Introduction to Machine Learning – NPTEL (IIT Madras)
- Python for Data Science – Coursera

Soft Skills

- Problem Solving, Analytical Thinking, Team Collaboration, Adaptability

Languages

- English, Hindi
